Home

- This is the home page of our game.
- Our game consists of answering words with their translations. When the game starts, a timer will also start. The player will have to translate as many words as possible until the timer reaches his limit.
- You can choose between 3 levels of difficulties: **easy**, **normal** and **hard**.
- By clicking on “**Personalized**” you will be able to play a customized mode while on “**Settings**” you will be able to change/set some parameters of the game.
- By clicking on “**Saved files**” you can see your saved points.

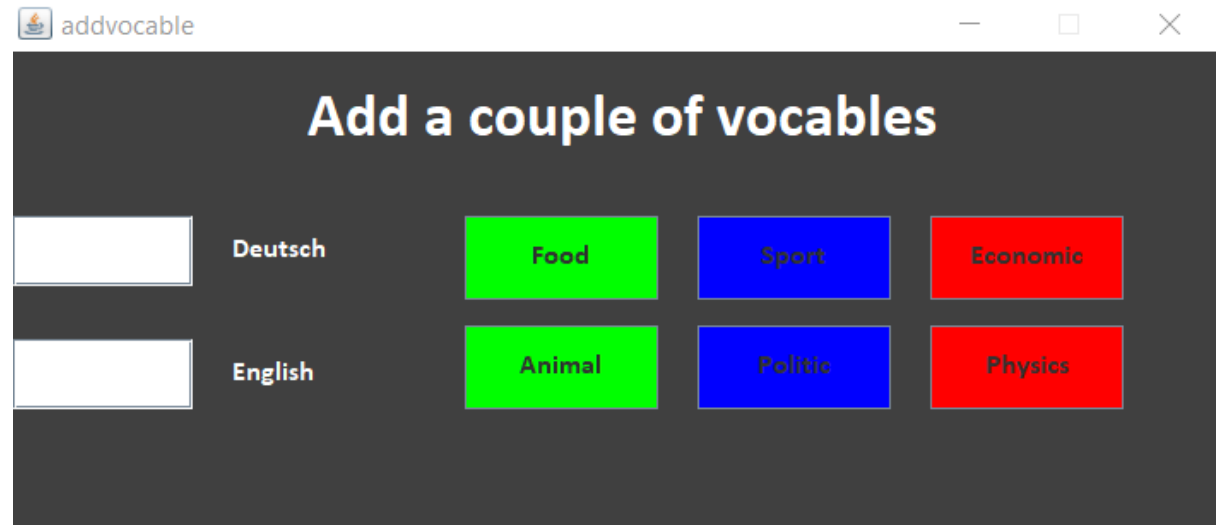

Settings

- By pressing “Add a couple of words” you can add other words to the different levels
- If you want to set the timer to a different value you can move the pointer and then press “Set the Timer”
- If you want that the program changes the language, then press "change".

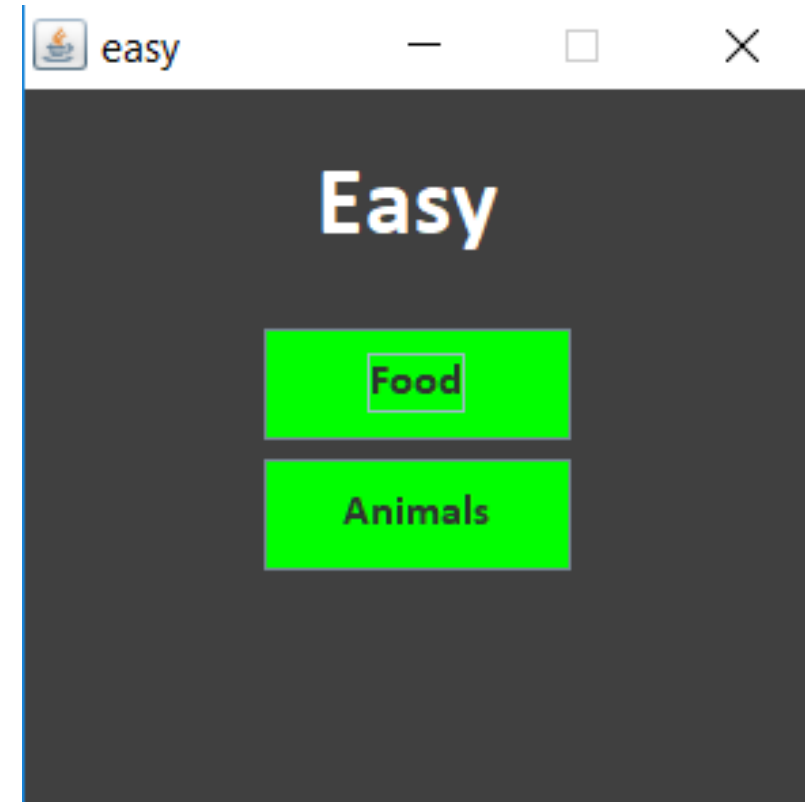

Add a couple of words

- You can write words in empty fields and then, by pressing one of the buttons, you will add the word pair to the selected level

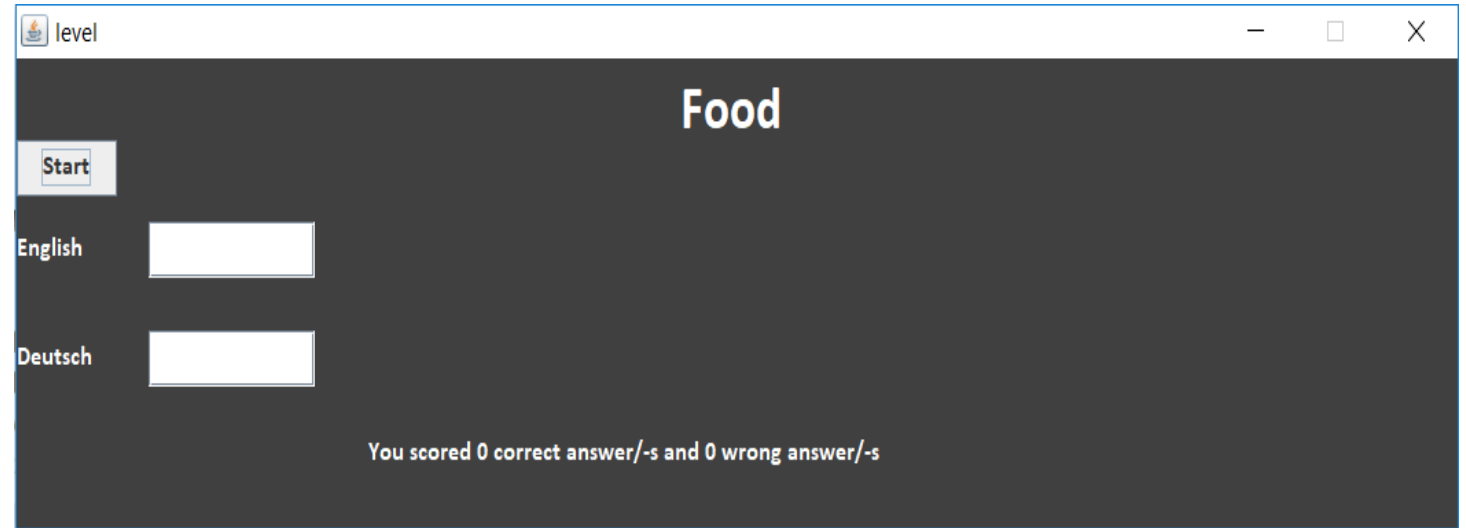

Easy

- After you have selected a level of difficulty you can choose between two groups of vocs.

The game

- By pressing “Start” the timer begins
- You must write the right voc in German/English and than press “Verify”

The screenshot shows a web application window with a title bar containing a small icon and the text 'level'. The main content area has a dark background. At the top right, the word 'Food' is displayed in a large, white, sans-serif font. On the left side, there is a vertical stack of elements: a 'Start' button, followed by the label 'English' next to a white input field, and then the label 'Deutsch' next to another white input field. At the bottom center, a line of text reads 'You scored 0 correct answer/-s and 0 wrong answer/-s'.

The game

- After you have finished your seconds, you can save your results with a name by pressing “save your result” and see your results by pressing “go to your saved files”
- You can restart the level by clicking on “Start”

level

5 Food

Start

English

Deutsch

save your result

go to your save files

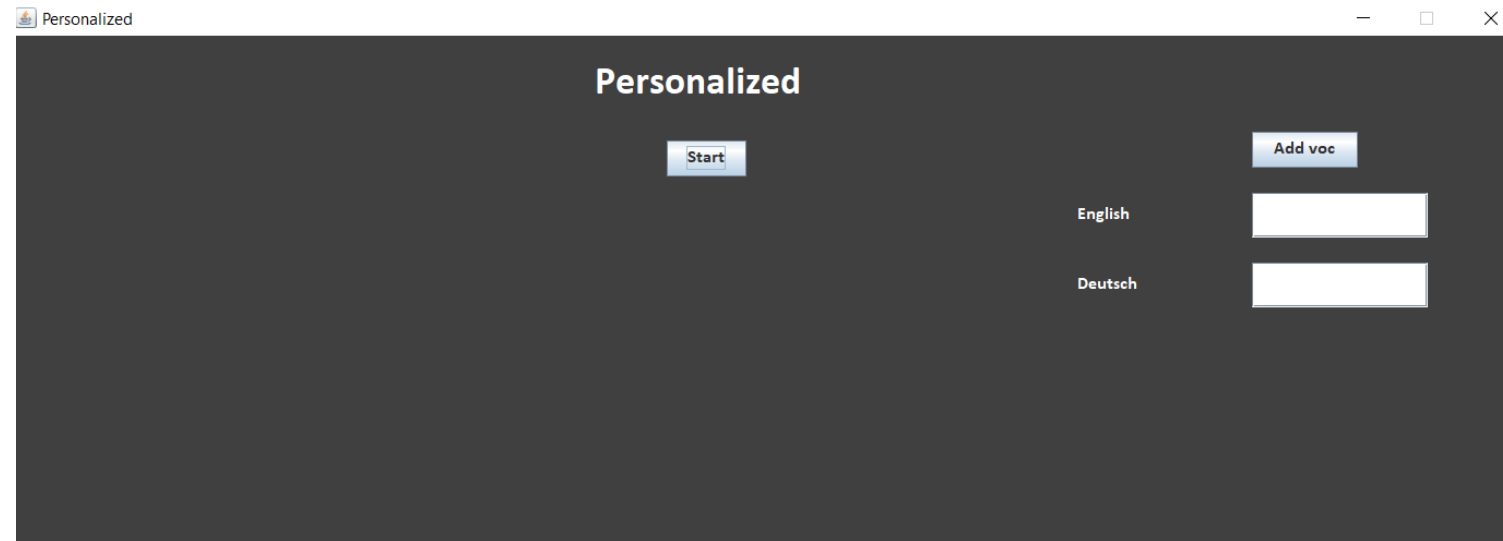

write a title for your save file

Wrong answer

You scored 0 correct answer/-s and 5 wrong answer/-s

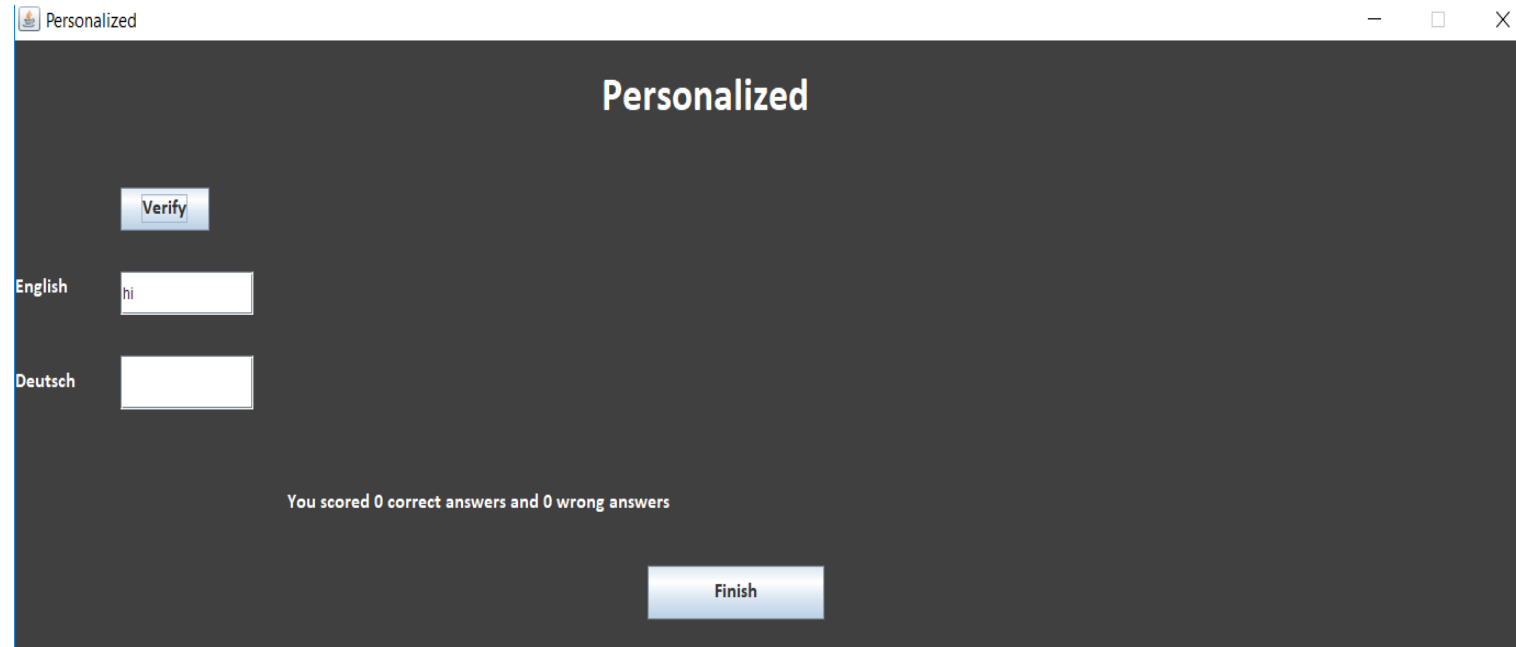

Personalized

- In the level “Personalized” you can play only with the vocs that you entered in the program.
- Write all words that you want and then press “Add Voc”.
- When you have finished entering the words then press “Start” to start the program.

Personalized

- In the level “Personalized” you don’t have a timer. You can play as long as you want!
- The program will automatically save the number of correct and wrong answers.
- When you have finished you can press on “Finish”

The screenshot shows a window titled "Personalized" with a dark gray background. At the top right, there are standard window control buttons (minimize, maximize, close). The title "Personalized" is centered at the top in a large, white, sans-serif font. Below the title, there is a "Verify" button with a blue gradient and white text. Underneath the "Verify" button, there are two input fields. The first field is labeled "English" and contains the text "hi". The second field is labeled "Deutsch" and is currently empty. At the bottom center of the window, there is a status message: "You scored 0 correct answers and 0 wrong answers". At the bottom right, there is a "Finish" button with a blue gradient and white text.

Personalized

Verify

English hi

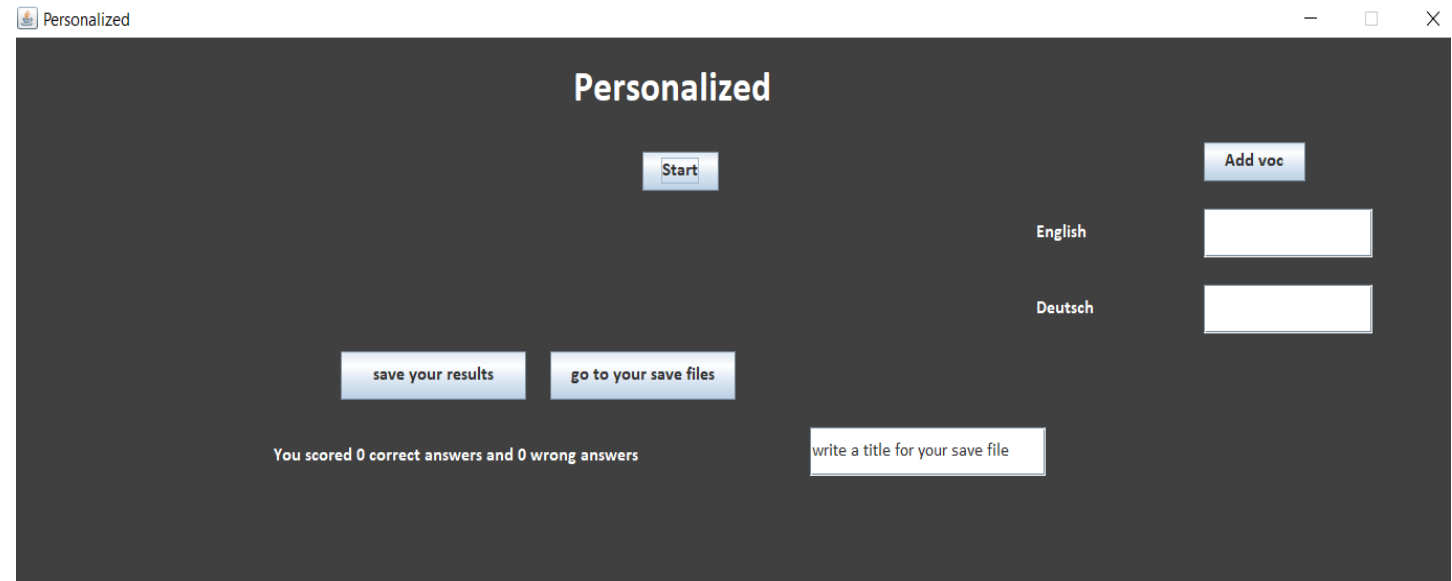

Deutsch

You scored 0 correct answers and 0 wrong answers

Finish

Personalized

- Now you can save your results with a name by pressing on “save your results”
- You can see your results by pressing on “go to your save files”
- Now if you want you can add other vocs or restart the game again with the vocs you previously set

Notes

- Write the words with only lowercase letters
- If you want to change the timer of a level you have to close it
